Safety

A custom incontinence mattress is included with every order to ensure comfort as well as cover the FDA's 7 Zones of Entrapment

Durability

The zPod® is made with high-quality and durable materials designed to withstand aggressive behaviors

Sensory Regulation

We are the only safety bed on the market with a hard enclosure that ensures the optimal sensory environment is created and maintained in conjunction with other sensory-friendly features

Features

Our team has meticulously designed the zPod® to be an inviting environment for children that are an elopement risk and/or have sensory regulation needs

zPods® come with the following features:

- **SAFE SPACE:** A durable structure and walls to keep kids completely safe and secure while allowing them to create the environment that is most comfortable for them
- **EASY CLEANING:** Removable doors ensures changing sheets and interior cleaning is a breeze
- **CONTROL PANEL:** Take control of your environment with sensory-friendly LED lights, fans for white noise and air circulation, and Bluetooth® speakers for soothing sounds and meditation tracks
- **SENSORY REGULATION:** The combination of a hard enclosure along with other sensory-regulating features make it easy for a child to stimulate or dysregulate when needed
- **ASSEMBLY:** The zPod is shipped flat in three boxes via LTL freight and can be fully assembled by two adults with no additional tools required
